

**AEREON**

CREATING A CLEANER PLANET

# CASE STUDY #170205

**GHOST SERIES AB-20 x 20'  
ENCLOSED COMBUSTOR**

## PROJECT DETAILS

Location:	Permian Basin
Flow Rate LP:	20.0 MSCFD
LP Inlet Pressure ( $\Delta P$ ):	4 oz/in.2
Smokeless %:	100%
Pilot & Controls:	ProFire 2100
Solar Package:	No Electricity Required
Installed Year:	2017

**Aereon's Ghost Series Enclosed Combustor (EPA Certified for Quad O Compliance)** is used to burn off waste natural gas from a low pressure tank. The technology used for the Ghost combustor allows for 100% smokeless combustion without requiring any utilities for operation. A highly reliable solar ignition package is utilized for convenience and dependability. A deflagration arrestor is also installed in the supply line to prevent flame backflash.

**AEREON Quad O certified Combustors!**
