CREATING A CLEANER PLANET

CASE STUDY #170402

MODIFICATION OF COMPETITION - DESIGNED ENCLOSED COMBUSTOR

PROJECT DETAILS

Location: SANTA ROSA, CA &
DEXTER, MI

Max Heat Release:
2.4 MMBTU/HR

Application: Food Services
(Brewery)

Customer purchased a flare system designed by a competitor, and upon installation, determined that they had issues lighting the burner. Detailed analysis of the design revealed that the burner design was not appropriate for the application. AEREON's Service & Engineering teams reviewed the design, and modified both the burner and pilot to insure stable ignition and reliable operation.
