

AEREON QUALITY POLICY

Aereon aims to become the leading company for the supply of gas and vapor treatment systems and services in the Energy Industry.

We want to establish a prefer partnership with the major companies in the Energy Business.

We aim to create and retain a long-term relationship with our customers by supporting their operations and keeping them in compliance with local and international environmental and safety regulations.

To achieve the above we must:

Thoroughly investigate the needs and requirements of our customers by applying the Voice of the Customer strategy to achieve their maximum satisfaction

Offer highly customized solutions

Present innovative solutions with competitive advantages

Invest resources in the development of new technologies and solutions

Continue on building a reputation based on experience, capability, and professionalism

Aereon's expectations in the implementation of the quality management system

Optimize business processes by eliminating all wasteful practices and improve efficiency (lean thinking)

Apply the principle of continuous improvement at a personal and team level in order to become the point of reference for our Customers

Create an effective Team environment where each individual experiences a sense of belonging where workers feel secured, supported, and enhanced

Develop partnerships with our Suppliers to find vanguard and sustainable solutions that fully meet the expectations of our Customers

Aereon is aware of the important role of the quality system which is tailored to pursuit efficiency, employee pride and customer satisfaction.

Aereon commits to meet all applicable requirements, whether binding or expected, explicit or implicit, of all interested parties.

We love what we do, and we work hard to develop smart cost-effective engineering solutions in the Energy Industry.
